Define the Problem Statements

Date	17 October 2022
Team ID	PNT2022TMID27352
Project Name	Industry-specific intelligent fire management system
Maximum Marks	2 Marks

Customer Problem Statement Template:

In emergency situations, such as building fires, the rescue team must quickly undertake the most appropriate intervention strategy aimed at preventing loss of human life. Emerging hardware and software technologies such as sensors, embedded systems, drones, Cloud, Artificial Intelligence and Building Information Modelling tools, offer exceptional opportunities in this context. In particular, the attempt to combine and integrate the Internet of Things technologies is very interesting in the context of future smart cities.
